Internet Safety 2013

Task #1

Below are different links to four different Internet Safety Quizzes. I would like you to go to each link one at a time and take the quiz. When you receive your results take a screenshot (Alt + Prt Scrn) of those results and paste them into a word document. Each quiz result should have its own screenshot, so in the end you will have four screenshots in your word document. Please take the quizzes honestly and to the best of your ability.

Task #2

Once you have completed the above tasks go back to your document and write a summary paragraph summarizing five to seven pieces of information about internet safety that you learned or are more aware of. This must be above your screenshots. I have written the two sentences for you.

The internet is arguably the greatest tool in the world, but it can also be incredibly dangerous. There are multiple ways for users to safe while using the internet.

Task #3

On a new page in your document create a list in bulleted format; list the top six (does not have to be in order) in your opinion MOST IMPORTANT internet safety guidelines that you feel any user should follow. Your poster should be something that I could post in my classroom to remind students to be safe! Posters should catch your eye…so in your document include a few different pictures that relate to the objects in your list, borders, wordart, different fonts, etc.

Save your document as Hour-Last Name- Internet Safety. Then submit your document at turn-in for the assignment in Edmodo as a pdf.

You are now an expert on Internet Safety!
